ABOUT ME

Backend Developer | PHP programmer | Laravel Experience | Interested in PYTHON

I learned programming by doing my personal projects.

I selected some real projects and I learned different skills by doing these projects.

I learn new things by solving real challenges.

I created many web applications with different tools. I love challenges and learning new things.

why am I good for your company? because I love growing and I am committed to standards and doing the best.

I can help your company grow.

you can see my portfolio and projects on my personal website: arashabedi.com

or on my GitHub: github.com/arashabedi

WORK EXPERIENCE

10/02/2021 – CURRENT – Babol, Iran

Backend Developer

Asredade

Asredade is a software company that focuses on AI projects.

I developed some backend projects in this company.

I work on interfaces between the main server and clients.

I developed some SDK that clients can interact with our company services by SDK.

to develop this SDK I used Laravel , Mysql , Redis and I created many API

PROJECTS

● **TeleBot Framework (PHP OpenSource Telegram Bot Framework)**

<https://github.com/arashabedii/telebot>

recently I published my telegram bot framework.

with this frameword, you can create any kind of telegram bot simply.

this framework is fully object-oriented programming (OOP)

this framework is very flexible and supported other packages.

purpose of creating this framework is that you just focus on your idea and product and don't waste your golden time by creating some handlers or basic things

06/05/2021 – 03/07/2021

● **Flora (Flowers Shopify Website)**

Flora is a shop website where customers can see many kinds of flowers and buy beautiful flowers.

Flora developed by PHP & Bootstrap (HTML , CSS , JavaScript).

I developed the backend of this website.

I used MySql to store data.

I used object-oriented programming in this project.

this project has a full admin panel that admins can create categories and add products and can control orders and all sections of this website.

● **Spotify Clone (music streaming website)**

Spotify Clone is a website to share music. like Spotify.

to develop the front-end of this website I used HTML , CSS , JavaScript , JQuery , Ajax

and to develop the backend of this website I used PHP & MySQL.

on this website you can:

search songs, artists, albums, and so on

discover and listen to songs and podcasts

create albums and your favorite playlists
